Rising to the challenge, with a reputation as strong as the structures we build.

EXPERIENCED BUILDERS know that what counts is framing on the inside, and with Woodward Steel Group on the job they know quality is built in from the very beginning. Clients turn to Woodward Steel Group for our fair pricing, reliability, safety practices, and responsiveness to their needs.

Woodward Steel Group offers a wide array of services from structural steel erection, pre-cast and tilt-up erection, sheet metal fabrication and installation, to complete steel building systems, including our over 55 year relationship with Butler Manufacturing.

When you work with Woodward Steel Group, you can count on our decades of experience, reliability and the integrity of a proven leader in the field. We bring state-

of-the-art equipment and industry-best techniques to every job. We staff our jobs with committed professionals who benefit from specialized and ongoing training, where our work is performed under stringent controls and safety procedures.

We are proud of our reputation, of our achievements and especially of the satisfaction that motivates our clients to entrust us with their next project. That has long been the Woodward advantage, and our commitment to that tradition is built into our every job.
